

incomeSvcEditor.cpp

reportStack.cpp

```
graph TD; A[incomeSvcEditor.cpp] --> C[incomeSvcEditor.h]; B[reportStack.cpp] --> C;
```

incomeSvcEditor.h

The diagram illustrates a dependency relationship between three C++ files. At the top, two source files are shown in white boxes with black borders: 'incomeSvcEditor.cpp' on the left and 'reportStack.cpp' on the right. Arrows from the bottom of each of these boxes point downwards to a single header file, 'incomeSvcEditor.h', which is located at the bottom and has a solid black background with white text. This indicates that both source files include or depend on the header file.
