

dateEdit.cpp

journalTable.cpp

dateEdit.h

```
graph TD; dateEditCpp[dateEdit.cpp] --> dateEditH[dateEdit.h]; journalTableCpp[journalTable.cpp] --> dateEditH;
```

The diagram illustrates the dependencies of the `dateEdit.h` header file. It features three rectangular boxes: `dateEdit.cpp` at the top left, `journalTable.cpp` at the top right, and `dateEdit.h` at the bottom center. The `dateEdit.h` box is black with white text, while the others are white with black text and borders. Two dark blue arrows point from the bottom of the `dateEdit.cpp` and `journalTable.cpp` boxes to the top of the `dateEdit.h` box, indicating that both source files depend on this header.
