

accountEditItem.cpp

accountTable.cpp

journalTable.cpp

accountEditItem.h

```
graph TD; A[accountEditItem.cpp] --> D[accountEditItem.h]; B[accountTable.cpp] --> D; C[journalTable.cpp] --> D;
```

The diagram illustrates a dependency structure where three source files (accountEditItem.cpp, accountTable.cpp, and journalTable.cpp) all depend on a single header file (accountEditItem.h). The header file is represented by a black box with white text, while the source files are in white boxes with black text. Blue arrows point from each source file to the header file.
