

accountEditType.cpp

accountTable.cpp

```
graph TD; A[accountEditType.cpp] --> C[accountEditType.h]; B[accountTable.cpp] --> C;
```

accountEditType.h

The diagram illustrates the dependencies of the header file `accountEditType.h`. Two source files, `accountEditType.cpp` and `accountTable.cpp`, are shown at the top. Arrows point from each of these files down to the `accountEditType.h` header file at the bottom, indicating that both source files depend on the header.
