

accountStack.cpp

tabs.cpp

```
graph TD; A[accountStack.cpp] --> C[accountStack.h]; B[tabs.cpp] --> C;
```

accountStack.h

The diagram illustrates the dependencies of the `accountStack.h` header file. It is represented by a black box at the bottom. Two blue arrows point towards it from above: one from the `accountStack.cpp` box on the left and one from the `tabs.cpp` box on the right. This indicates that both source files depend on the `accountStack.h` header.
