

closeDialog.cpp

mainStack.cpp

closeDialog.h

```
graph TD; A[closeDialog.cpp] --> C[closeDialog.h]; B[mainStack.cpp] --> C;
```

The diagram illustrates the dependencies of the `closeDialog.h` header file. It features three rectangular boxes: `closeDialog.cpp` at the top left, `mainStack.cpp` at the top right, and `closeDialog.h` at the bottom center. The `closeDialog.h` box is black with white text, while the others are white with black text. Two dark blue arrows point from the bottom of the `closeDialog.cpp` and `mainStack.cpp` boxes to the top of the `closeDialog.h` box, indicating that both source files depend on this header.
